Early Human Development, 30 (1992) 265–267
Elsevier Scientific Publishers Ireland Ltd.

Subject index

albumin, bilirubin, brain, bilirubin encephalopathy, hyperoxia, hypoxanthine, xanthine oxidase, free radicals, rat, 171
antepartum stillbirth, unexplained stillbirth, epidemiology, 147
anthropometry, fetal growth, intrauterine growth retardation, ultrasound, newborn, 139
asphyxia, low birthweight, development, developmental delay, brainstem, auditory evoked responses, hearing, neurology, 61
auditory brain stem responses, brain maturation, infants of diabetic mothers (IDMs), 221
auditory evoked responses, low birthweight, asphyxia, development, developmental delay, brainstem, hearing, neurology, 61
autoregulation, preterm infant, blood transfusion, Doppler, cerebral blood flow, 211

behavioral states, human fetus, quantitative analysis, 93
bilirubin, albumin, brain, bilirubin encephalopathy, hyperoxia, hypoxanthine, xanthine oxidase, free radicals, rat, 171
bilirubin encephalopathy, bilirubin, albumin, brain, hyperoxia, hypoxanthine, xanthine oxidase, free radicals, rat, 171
blood transfusion, preterm infant, Doppler, cerebral blood flow, autoregulation, 211
brain, bilirubin, albumin, bilirubin encephalopathy, hyperoxia, hypoxanthine, xanthine oxidase, free radicals, rat, 171
brain maturation, auditory brain stem responses, infants of diabetic mothers (IDMs), 221
brainstem, low birthweight, asphyxia, development, developmental delay, auditory evoked responses, hearing, neurology, 61
Braxton Hicks' contractions, Doppler, fetus, ultrasound, cerebral blood flow, 33
bronchopulmonary dysplasia, low birth weight infant, growth, general health, cardiopulmonary sequelae, 109

cardiopulmonary sequelae, low birth weight infant, bronchopulmonary dysplasia, growth, general health, 109
cerebral blood flow, Doppler, fetus, Braxton Hicks' contractions, ultrasound, 33
cerebral blood flow, fluctuation, preterm newborn, 41
cerebral blood flow, preterm infant, blood transfusion, Doppler, autoregulation, 211

development, low birthweight, asphyxia, developmental delay, brainstem, auditory evoked responses, hearing, neurology, 61
developmental delay, low birthweight, asphyxia, development, brainstem, auditory evoked responses, hearing, neurology, 61
Doppler, fetus, Braxton Hicks' contractions, ultrasound, cerebral blood flow, 33
Doppler, preterm infant, blood transfusion, cerebral blood flow, autoregulation, 211
Doppler ultrasound, fetal circulation, glucose, fetal heart rate, 1
Doppler ultrasound, internal carotid, umbilical artery, small for gestational age, 249

epidemiology, antepartum stillbirth, unexplained stillbirth, 147
extremely low birthweight infants, growth and development, morbidity, 229

factors, ROP, risk, oxygen, light, 121
fat balance, low birth weight formula, medium chain triglycerides, stools, weight gain, 21
fetal circulation, Doppler ultrasound, glucose, fetal heart rate, 1
fetal growth, intrauterine growth retardation, ultrasound, anthropometry, newborn, 139
fetal heart rate, Doppler ultrasound, fetal circulation, glucose, 1
fetal hypoxaemia, intra-uterine growth retardation, fetal movements, movement quality, premature rupture of the membranes, 193
fetal movements, intra-uterine growth retardation, movement quality, premature rupture of the membranes, fetal hypoxaemia, 193
fetus, Doppler, Braxton Hicks' contractions, ultrasound, cerebral blood flow, 33

flow cytometry, hepatic hematopoiesis, singleton gestation, 101
fluctuation, cerebral blood flow, preterm newborn, 41
free radicals, bilirubin, albumin, brain, bilirubin encephalopathy, hyperoxia, hypoxanthine, xanthine oxidase, rat, 171

general health, low birth weight infant, bronchopulmonary dysplasia, growth, cardiopulmonary sequelae, 109
glucose, Doppler ultrasound, fetal circulation, fetal heart rate, 1
growth, low birth weight infant, bronchopulmonary dysplasia, general health, cardiopulmonary sequelae, 109
growth, n-6, n-3, long chain polyunsaturated fatty acids, preterm infant, 183
growth and development, extremely low birthweight infants, morbidity, 229

hearing, low birthweight, asphyxia, development, developmental delay, brainstem, auditory evoked responses, neurology, 61
hepatic hematopoiesis, flow cytometry, singleton gestation, 101
human fetus, behavioral states, quantitative analysis, 93
human fetus, REM period, micturition, temporal relationship, real-time ultrasound, 11
hyperoxia, bilirubin, albumin, brain, bilirubin encephalopathy, hypoxanthine, xanthine oxidase, free radicals, rat, 171
hypoxanthine, bilirubin, albumin, brain, bilirubin encephalopathy, hyperoxia, xanthine oxidase, free radicals, rat, 171

incidence of SGA, small for gestational age (SGA) infants, ultrasonic dating, 75
infants of diabetic mothers (IDMs), auditory brain stem responses, brain maturation, 221
internal carotid, Doppler ultrasound, umbilical artery, small for gestational age, 249
intra-uterine growth retardation, fetal movements, movement quality, premature rupture of the membranes, fetal hypoxaemia, 193
intrauterine growth retardation, fetal growth, ultrasound, anthropometry, newborn, 139

light, ROP, risk, factors, oxygen, 121
long chain polyunsaturated fatty acids, n-6, n-3, preterm infant, growth, 183
low birth weight formula, fat balance, medium chain triglycerides, stools, weight gain, 21
low birth weight infant, bronchopulmonary dysplasia, growth, general health, cardiopulmonary sequelae, 109
low birthweight, asphyxia, development, developmental delay, brainstem, auditory evoked responses, hearing, neurology, 61

maternal smoking, pregnancy, tooth size, odontogenesis, 49
medium chain triglycerides, low birth weight formula, fat balance, stools, weight gain, 21
micturition, REM period, temporal relationship, human fetus, real-time ultrasound, 11
morbidity, extremely low birthweight infants, growth and development, 229
morphine, pancuronium, stress, ventilation, 241
movement quality, intra-uterine growth retardation, fetal movements, premature rupture of the membranes, fetal hypoxaemia, 193

n-3, n-6, long chain polyunsaturated fatty acids, preterm infant, growth, 183
n-6, n-3, long chain polyunsaturated fatty acids, preterm infant, growth, 183
neurology, low birthweight, asphyxia, development, developmental delay, brainstem, auditory evoked potentials, hearing, 61
newborn, fetal growth, intrauterine growth retardation, ultrasound, anthropometry, 139

odontogenesis, maternal smoking, pregnancy, tooth size, 49
oxygen, ROP, risk, factors, light, 121

pancuronium, morphine, stress, ventilation, 241
pregnancy, maternal smoking, tooth size, odontogenesis, 49
premature rupture of the membranes, intra-uterine growth retardation, fetal movements, movement quality, fetal hypoxaemia, 193
preterm infant, blood transfusion, Doppler, cerebral blood flow, autoregulation, 211
preterm infant, n-6, n-3, long chain polyunsaturated fatty acids, growth, 183
preterm newborn, fluctuation, cerebral blood flow, 41

quantitative analysis, human fetus, behavioral states, 93

rat, bilirubin, albumin, brain, bilirubin encephalopathy, hyperoxia, hypoxanthine, xanthine oxidase, free radicals, 171
real-time ultrasound, REM period, micturition, temporal relationship, human fetus, 11
relative dose response, vitamin A deficiency,

vitamin A supplementation, retinol-binding protein, 163
REM period, micturition, temporal relationship, human fetus, real-time ultrasound, 11
retinol-binding protein, vitamin A deficiency, vitamin A supplementation, relative dose response, 163
risk, ROP, factors, oxygen, light, 121
ROP, risk, factors, oxygen, light, 121

singleton gestation, hepatic hematopoiesis, flow cytometry, 101
small for gestational age (SGA) infants, ultrasonic dating, incidence of SGA, 75
small for gestational age, Doppler ultrasound, internal carotid, umbilical artery, 249
stools, low birth weight formula, fat balance, medium chain triglycerides, weight gain, 21
stress, morphine, pancuronium, ventilation, 241

temporal relationship, REM period, micturition, human fetus, real-time ultrasound, 11
tooth size, maternal smoking, pregnancy, odontogenesis, 49

ultrasonic dating, small for gestational age (SGA) infants, incidence of SGA, 75
ultrasound, Doppler, fetus, Braxton Hicks' contractions, cerebral blood flow, 33
ultrasound, fetal growth, intrauterine growth retardation, anthropometry, newborn, 139
umbilical artery, Doppler ultrasound, internal carotid, small for gestational age, 249
unexplained stillbirth, antepartum stillbirth, epidemiology, 147

ventilation, morphine, pancuronium, stress, 241
vitamin A deficiency, vitamin A supplementation, relative dose response, retinol-binding protein, 163
vitamin A supplementation, vitamin A deficiency, relative dose response, retinol-binding protein, 163

weight gain, low birth weight formula, fat balance, medium chain triglycerides, stools, 21

xanthine oxidase, bilirubin, albumin, brain, bilirubin encephalopathy, hyperoxia, hypoxanthine, free radicals, rat, 171

Early Human Development, 30 (1992) 269
